

Corporate Objectives Management and Performance Analysis Tool

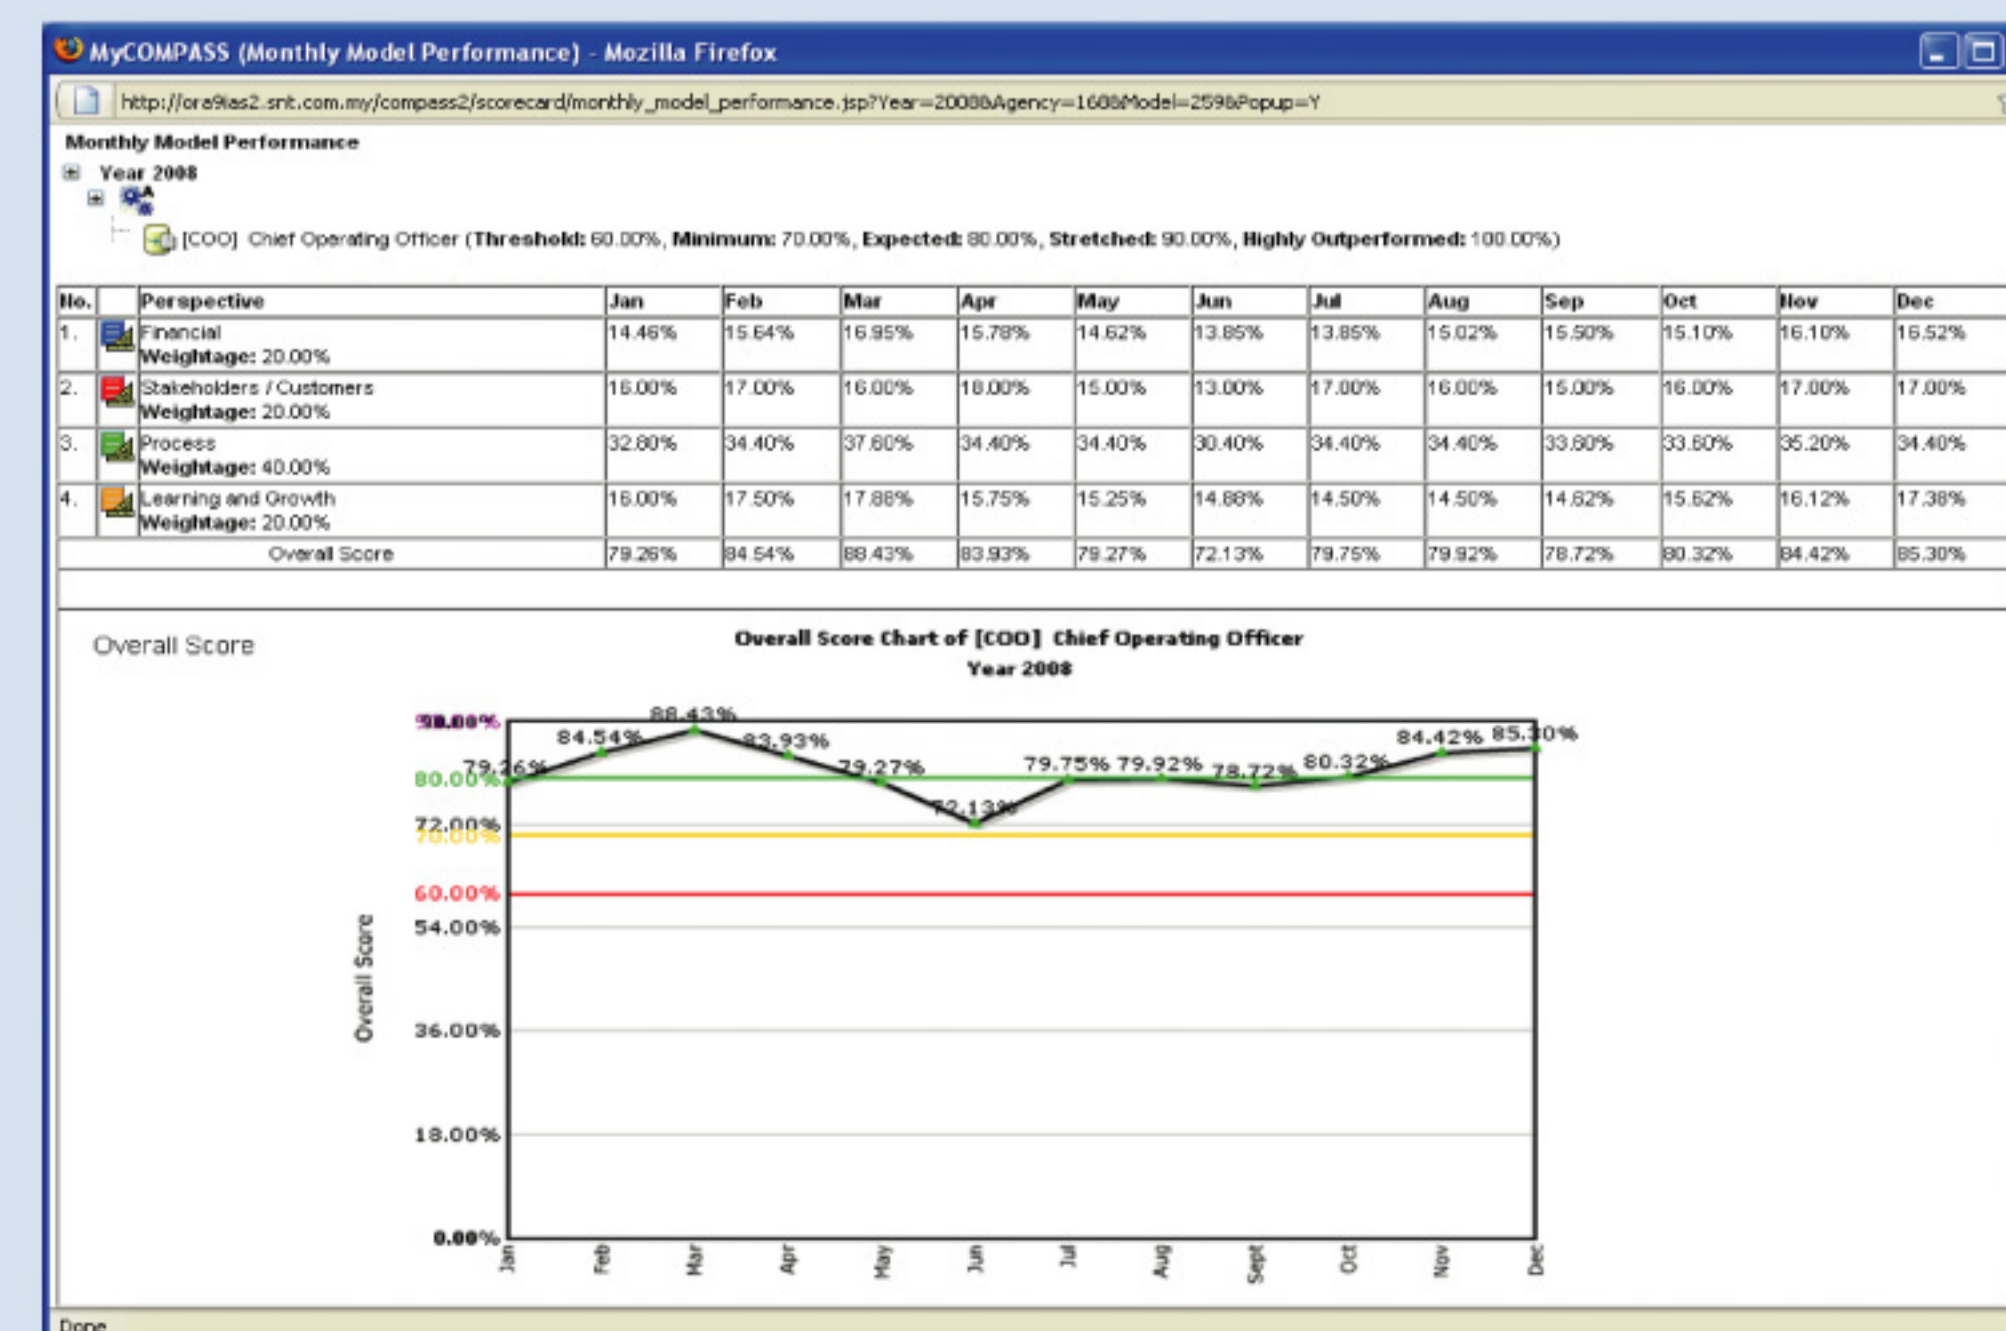

MyCOMPASS is a web-based performance analysis system based on the Balanced Scorecard Framework that enables organizations to translate their vision, mission, strategy and objectives into tangible measurements for evaluation according to key performance perspectives.

An organization can measure and evaluate its activities in various key performance perspectives such as:

Organisation Performance Overview

Organizational performance by division. Scores are based on weighted percentages of an organization's key perspectives.

Monthly Performance chart allows top management to quickly renew the various sections' progress towards their performance goals.
